His research on space atmosphere using global positioning system technology data made him one of the five awardees out of UCLA's 1,155 Post-doctoral contestants. Currently the 34-year old Dr. Yizengaw is in Trieste, Italy to help prepare the African Small Instrument Array satellite for the International Heliophysical Year (IHY). He talked to the VOA Amharic program's Fregenet Asseged about his humble background and his award-winning research.
